

Amendments to the Specification

Please add the following new headings after the title:

BACKGROUND OF THE INVENTION

B1 1. Field of the Invention

Please add the following new heading after the paragraph ending on line 5 of page 1:

B2 2. Description of Related Art

Please add the following new heading after the paragraph ending on line 18 of page 3:

B3 SUMMARY OF THE INVENTION

Please add the following new heading after the paragraph ending on line 3 of page 4:

B4 BRIEF DESCRIPTION OF THE DRAWINGS

Please add the following new heading after the paragraph ending on line 18 of page 4:

B5 DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENTS

Please replace the paragraph beginning on page 5, line 5, with the following rewritten paragraph:

As shown in figure 3, a TFT operational amplifier configured as a sample and hold circuit is used to provide a variable  $V_{DD}$ -voltage source so that the drain-source voltage of  $T_2$  in the reproduction stage is the same as that during the programming stage. During the programming stage, the voltage at the source of  $T_2$  is passed to the storage capacitor  $C_2$  at the input of the unity-gain OpAmp. The output of the OpAmp faithfully reproduces the voltage and also provides the current to the OELD through  $T_2$ . The driving waveform is the same as that for the circuit of figure 2.
